Shore-to-Ship Solutions

Use Station 711 Direct VoIP solutions to make low-cost calls from your office, your mobile phone or your computer, to anywhere on the planet including your vessels and branches, and save up to 80%!

Station 711 offers you unique VoIP satellite communication solutions, which will substantially reduce your Shore-to-Ship communication costs, while simplifying communication with your vessels and branches. We are the only service provider who offers customized VoIP Shore-to-Ship solutions that are integrated into your existing telephony and data infrastructure.

Flexible Operation Option

Our solutions are based on the most innovative and advanced VoIP technology available today, and offer the flexibility of customization to suit your individual needs. They include Analog VoIP Gateways (FXS/FXO), Media VoIP Gateways and Integrated gateways for GSM-VoIP (CDMA/GSM), which provide quality voice and fax services. All services can be provided in a number of capacity configurations that offer room for future growth.

Customers Support

Our experienced engineers will provide you with close, intensive guidance, from the decision-making stage up to the installation and assimilation of the system. The system will be implemented by Station 711.

To complement the system implementation, Station 711 offers friendly support, which is easily accessible 24 hours a day, 7 days a week.

Optional Functions

- ▶ 711 Communicator
- ▶ Local virtual numbers
- ▶ Call-back server
- ▶ 2-Stage dialing
- ▶ Direct line access
