

Your Complete Crew Welfare Solution

CrewSpot is a comprehensive crew welfare solution that allows you to provide your crew with the most advanced communication platform and the ultimate user experience; that is also simpler and more cost effective for you to manage.

An all-in-one maritime communication solution, CrewSpot combines the entire range of crew welfare solutions into a single comprehensive platform. This platform acts as a central on-ship portal and allows you to provide your crew with the broadest communication options, as well as an easy-to-use interface, simple expense management, and more informed, and therefore more efficient, usage.

CrewSpot supports and simplifies all onboard communication operations and reduces operational overheads, by providing a solution that is easy to install and maintain, equipped with advanced management tools, smart and efficient bandwidth management, and a wide variety of simple payment options.

► Provide your crew with the ultimate crew welfare solution

Improved crew welfare – Enable complete internet connectivity, including: web browsing, emails, voice or VoIP calls, SMS, chat (gTalk, Facebook, MSN, ICQ), Facebook access and more.

BYOD – Support crew communications via ship computers or personal device, including: laptops, tablets and smartphones.

Efficient web browsing – Allow users to select browsing modes and control the image quality and compression, while knowing the cost in advance.

Smart emailing – Provide an insightful emailing tool that shows the price before sending and receiving emails.

Whitelists and blacklists – Give users full and dynamic control over who they communicate with.

Balance dashboard – Show users all available services and their status, as well as a detailed data report for each transaction, and allow them to have full control over their budget.

► Enjoy simpler operations, less overhead and greater efficiency

Varied solution – Offer different services, applications and payment plans (including Pay-Per-Use model) to different kinds of users.

Unique pricing engine – Get full control over pricing and data usage, down to a single service. No vouchers – Provide online payment options and reduce operational overhead.

Smart compression and data optimization – Enhance efficiency & cost effectiveness.

Network management tools – Track network behavior to prioritize and route data accordingly.

Detailed usage reports – Know exactly what is going on with your network, from a single crew member, to the service provider.
